

Mace Group

Case Study

Profile:

Mace Group is an international consultancy and construction company. Employing over 4,000 people in 70 countries, it has an annual turnover in excess of £1.18bn. In 2013, it was awarded 'Project and Construction Firm' of the year.

Technologies Deployed:

Smart building management system with automatic switching, wireless network, Cat6 data infrastructure, routers, and switches.

Works:

Wow WiFi designed, specified and installed a fast and robust wireless network and Cat6 data network with a cloud-based software reporting tool. The network was used to monitor staff's energy consumption in real-time - across the internet - to a cloud-based reporting application.

Wow WiFi was also responsible for the installation of automatic PC shutdown software and an advanced building management system to automatically power down the office space safely, once the PC's were identified as 'shut down'.

"Mace Group likes to be on the cutting edge of innovation and the system that Wow WiFi provided was instrumental in our British Safety Council 'Sword of Honour' award."

Phil Coutts
Director, Mace Group
