

Hermes Real Estate

Case Study

Profile:

Hermes Real Estate offers client-focused property investment solutions and is one of the largest real estate managers in the UK, with £7.1bn* of assets under management in both UK and international portfolios.

Technologies Deployed:

Fast internet, Wi-Fi and Cat6 data infrastructure, routers, and switches.

Works:

Finsbury Circus was refurbished to provide 190,000 sq ft of first class, air-conditioned offices to tenants.

Hermes Real Estate approached Wow Wi-Fi to install a network quickly and efficiently, while keeping the aesthetics of this historic building virtually untouched.

Wow WiFi were able to install a fast and robust wireless network to provide high speed internet to commercial tenants and with detailed planning, preserved the integrity of the historic building.

"Wow WiFi installed the network on budget and ahead of schedule. The building is unscathed and we can now move in with everything already tested and working; very happy!"

Peter Melhuish
Managing Director, Portable Office Company
